

LONG-TERM CARE INSURANCE OPTIONS

Traditional Products

Traditional long-term care coverage. These can work well for clients who are less liquid but have plenty of income, and who want to buy a stand-alone product but may not have a need for life insurance.

Linked Benefit Products

Life/long-term care combination products typically limit number of premium payments. The premium payment can come from money found by repositioning your client's stock portfolio or transferring money from your client's currently held CDs.

Life Products with LTC or Chronic Illness Riders

Life insurance with long-term care riders. For clients who have no cash and no extra income, a life insurance policy with built-in living benefit riders can be the least expensive way to wrap long-term care insurance into the planning process.

Traditional LTC

- LifeSecure
- Mutual of Omaha
- National Guardian Life
- Thrivent
